1) Match the answer to complete the sentence:
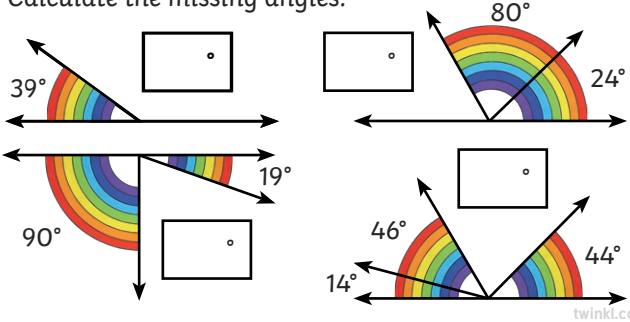

A straight line is made up of _____ right angles.
A right angle is _____ degrees.
A straight line is _____ degrees.

(180)   (90)   (2)

2) Calculate the missing angles.

---

1) Jen says, "If I turn from 2 o'clock to 8 o'clock, this is a half turn – 180°".
Is Jen correct? Prove it!
What other turns can you identify on a clock face that would be the same value of 180°?

2) Floria is describing angles on a straight line for her friend to draw. She says one of the angles is 32°, another is a right angle and the final angle is 68°.
Is Floria correct? Prove it!

Calculate the missing angles on this picture and explain how you worked them out.
a = _____ °.
I know this because ...
b = _____ °.
I know this because ...
c = _____ °.
I know this because ...
d = _____ °.
I know this because ...

1) Create your own straight-line angle problem picture like the one above.
Don't forget to label some of the angles and work out the answers yourself!
