Help sheet for Year 4 maths

June 22nd to 26th 2020

Before you start, look carefully at the Knowledge Organiser – remember to keep using it to help you through the week! For each of these sheets, there are two sets on a page so only do one (!) and the questions get harder as you go down – hopefully most of you can get to the second set at least.

Monday – 1	Have your Knowledge Organiser ready to help. Remember 1hr = 60 minutes; 1 minute = 60 seconds. Remember that ½ a minute is 30 seconds.
Tuesday – 2	Have your Knowledge Organiser ready to help. When comparing, make sure each one is in the same unit – you might have to convert them before comparing. A calendar might be helpful!
Wednesday – 3	Have your Knowledge Organiser ready to help. Make sure you check if you are using a.m. or p.m. Think about how the time is written in words.
Thursday - 4	Have your Knowledge Organiser ready to help. Converting with the 24-hour clock. Remember that for the p.m. times it changes: 1pm = 1300; 2pm = 1400; 3pm = 1500 etc. Make sure you check if you are using a.m. or p.m.
Friday - 5	Create your own knowledge organiser using what you have learnt this week.
